Document and Version Information

Document Information	
Document Code	Application_Requirement_Document_v1
Classification	Internal
Name	Application Requirement Document – Instruction for entries have been changed
Description	This document provides the application requirements for the implementation of development / modification of the rule of customs / security
Version	V2.0
Author	Alanoud Almousa
Published Date	4 JUN 2024

Application Development / Support Team	
Names	Roles
Alanoud Almousa	Developer – ZATCA
< Name 2>	Developer – SAS
Nidaa Alsaedi	Support & Testing – ZATCA
< Name 4>	Support & Testing - SAS

Implementation Approval - Stakeholders				
Version	Name	Role / Department	Signature Check	Approval Date
V1.0	Atheer Alhussan	Modelling and Research - Director		

General Overview

This document defines the application configuration requirements for the development / modification of rule / logic under the customs / security segment dictating the high-level application requirements, needs and the functionality in technical terms.

Targeting cases in Instruction for Trans-Shipment.

The configurations are planned to be addressed in SAS system as decided per the business discussion. Accordingly,

- **SAS configuration** is planned for the functional requirements covered under
 - Rules Functional Requirement

Rules Functional Requirements

Functional requirements break down application features and functions that allow rules to perform as intended. Functional requirements to include are related to:

- If / then behavior
- Data handling logic
- Rule workflows
- Administrative functions
- Performance requirements

Related functional requirements follow in below sub-sections:

1. Overview – Rule Information

Rule Information		
Rule Name	Instruction for Trans-Shipment	
Phase	Phase 0	
	Phase 1 [Cargo]	✓
	Phase 2 [Courier]	✓
	Phase 3 [Passenger]	
	No Phase	
Segment Type	Customs Rule	
	Security Rule	✓
Type of Development	New Rule Development	✓
	Modification of Existing Rule	
	Disable / Enable Rule	
Priority	High	✓
	Moderate	
	Low	

Table 1: Overview - Rule Information

Purpose / Objective and Performance of the Rule	
Rule Name	Instruction for Trans-Shipment
Goal	Targeting cases in Instruction for Trans-Shipment
Result	Targeting cases in Instruction for Trans-Shipment
Level of the Rule	Container

Table 2: Overview - Purpose of the Rule

2. Rule Workflow

2.1 Rules to be Referenced

Please refer to (REF - PR – 041) profile to create instruction for those cases.

Important Notes:

Please note the following items / points specifically related to the Main Rule:

- 1. check if there is any instruction has been created for CNTNR_MRK if the CNTNR_MRK is exist in the NEBARS tables and SAS tables.
- 2. Relay on below mapping:

column Name	Value
"forExport":	3 reflect "مسافنة"
"instructionReasonCode":	4 reflect "المانفست البحري"
"instructionReasonRemarks":	اخرى
"employeeNumber":	SAS_USER
"suspentionpReason":	4 reflect "اخرى"
"perioDateType":	1reflect "مرة واحدة"
"instructionStatus":	1 reflect "سارية"
"periodStartDate":	date,time when the job done to create the instruction
"portCode":	PORT_CD for the targeted container
"instructionType":	8 للحاويات
"instructionSource":	يوجد مؤشر خطورة عالي على البوليصة بناءً على تغير حالتها من وارد لمسافنة
"decreeNumber":	
"stopStaCode":	3 reflect "قبل الفسخ وقبل التسديد"
"SeaContainerMark":	CNTNR_MRK
"declarationIsn":	
"StatisticalIsn":
